

## The Client

Major Projects Victoria

## The Project

Project management of works to the Heritage listed Dukes Dock Pump House, which has the original steam driven pumps.

Works included:

- The dry docking of the Polly Woodside,
- Sealing the two 800mm diameter main intake suction pipes and the two 250mm diameter auxiliary intake suction pipes
- Facilitation of the anti-foul treatment to the hull of the Polly Woodside by the National Trust

## The Challenge

- Heritage listed site and the associated management
- Management and co-ordination across multiple stakeholders

## The Outcome

- Presentation of the historical pump house and Dukes Dock
- Sealing of the intake pipes to prevent further corrosion of the pumps and equipment in the pump house
