

The Client

The Project

- Olympic Dam expansion project feasibility study
- Pre-strip mining options

The Challenge

Selection of a Plant fleet, that satisfied the schedule requirements. This fleet required the access to a large part of the world's heavy earthmoving manufacture capacity.

The Outcome

- Flagstaff participated in the BHPB workshop relating to options for the early pre-strip operation
- Provided advice on several contracting options to feed into the study development

'experience makes a difference'
