

The Client

VicRoads

The Project

Remove trucks from the inner city Footscray and Yarraville suburbs with direct connection between the Westgate Freeway and Melbourne Port

The Challenge

Undertake the following aspects for the feasibility study assessment for three options in association with AECOM and GHD:

- Constructability review
- Cost estimates
- @Risk Monte Carlo risk assessment

The Outcome

The completed assignment included:

- Programming, construction staging and sequence analysis
- Risk adjusted cost modelling and contingency assessment
